EDUCATION

B. Tech in Computer Science Engineering | MIT World Peace University | 2023 – 2027

Class X & XII | The Bishop's School Camp, Pune | 2011 – 2023 Science Stream

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL

Web Technologies: React.js, HTML, CSS, Flask, REST APIs

Cloud & Tools: AWS (Rekognition, IAM), Git/GitHub, Jupyter Notebook, Vite

AI/ML & Data: Scikit-learn, TensorFlow/Keras, Pandas, NumPy, Database Concepts

PROJECTS

MCQ Quiz Web App | React.js, JavaScript, HTML, CSS, Vite

github.com/aadi173/PROJECTS/tree/main/Reactproject

- Built an interactive multiple-choice quiz application in React that dynamically renders questions from a structured question bank, validates user answers instantly, and reveals the correct answer after each attempt.
- Implemented a component-based architecture using React hooks for state management, and used Vite as the build tool to enable a faster local development and hot-reload workflow.

Network Intrusion Detection System | Python, Scikit-learn, Pandas, SMOTE

github.com/aadi173/PROJECTS/tree/main/ML

- Developed a machine learning pipeline on the NSL-KDD dataset to classify network traffic into attack categories (DoS, Probe, R2L, U2R) versus normal traffic, including data cleaning, encoding, and feature scaling.
- Addressed severe class imbalance using SMOTE oversampling and tuned Random Forest, SVM, and KNN classifiers, comparing model performance using precision, recall, F1-score, and confusion matrices.

Image Labelling & Detection using AWS Rekognition | Python, Flask, AWS Rekognition, IAM

<https://github.com/aadi173/PROJECTS/blob/main/DETECT%20LABELS%20WITH%20AMAZON%20REKOGNITION.pdf>

- Built a Flask-based web application that integrates the AWS Rekognition API to perform automated image labelling and object detection on user-uploaded images in real time.
- Configured IAM roles and least-privilege access policies to securely connect the application to AWS services, and documented the end-to-end cloud architecture, setup steps, and workflow for reproducibility.

EXTRACURRICULAR ACTIVITIES & LEADERSHIP

Tech Team Member at SYNAPSE AI Club

- Participated in hackathons and collaborative technical projects.
- Attended bootcamp sessions on machine learning, cloud computing, and Python conducted throughout the semester.
- Contributed to an AI-based project as part of club activities.

National Academic Immersion Program

- Participated in technical and industrial exposure sessions at Larsen & Toubro campus.
